With the completion of the roat which Mr. Gould last summer announced his intention of building, he will have a new and almost straight line between St. Louis and New Orleans. The Missouri Pacific hines will then extend from Denver to New Orleans, via St. Louis, and will in their course tap all of the traffic prints of the west and can draw upon the mining, grain course tap all of the traffic points of the west and can draw upon the mining grain and cattle industries by giving them one line to tidewater. The southern half of the line extends from Alexandria, La., where it connects with the Texas Pseific, into New Orieans, and due north to a point on the Iron Mountain line. From St. Louis to New Orieans the dine will traverse a rich country, in addition to the tidewater extension of the Missouri Pacific system.
